"PinPoint gives creative teams frame-accurate video feedback — directly inside Slack."

Executive Summary

PinPoint is the only video review tool that lives entirely inside Slack. Creative teams upload a video, click a button, and get timestamped, annotated feedback — all synced back to Slack threads in real-time. No new logins, no onboarding, no context-switching.

This plan targets **creative agencies** and **in-house marketing teams** as the primary ICP, leveraging Slack App Directory distribution, founder-led LinkedIn growth, and community marketing for an organic-first acquisition strategy.

🎯 **90-Day Target**

PHASE 1

Strategic Foundation

Ideal Customer Profile

ATTRIBUTE	PRIMARY ICP	SECONDARY ICP
Company type	Creative/marketing agencies (10-100 people)	In-house marketing teams at tech companies (50-500)
Verticals	Advertising, branding, social media agencies	SaaS, e-commerce, media companies
Team structure	Creative Director + 2-8 editors/designers + clients	Marketing Manager + 1-4 content creators
Tech stack	Slack (primary), Adobe Suite, Frame.io or none	Slack, Google Workspace, Loom
Budget authority	Agency owner or Head of Production	Marketing VP or Director
Revenue	$500K–$10M	$5M–$100M

Buyer Personas

👤 "Agency Alex"

Creative Director — 25-person agency, age 32-42

Pain: Client feedback scattered across email, DMs, and calls. Editors waste 2-3 hours/week chasing clarifications on vague comments.

Decides by: Trying free tools first, upgrades if team adopts. Values speed over feature depth.

"I need clients to point at the exact frame and tell me what's wrong."

👤 "Marketing Maya"

Content Lead — Series B SaaS, age 28-36

Pain: Produces 8-12 videos/month. Review cycles take 3-5 days because feedback comes as vague Slack DMs.

Decides by: Self-serve, prefers tools that integrate into existing workflow. Won't adopt anything requiring onboarding.

"We already live in Slack — I don't want another login."

Trigger Events

EVENT	WHY THEY SEARCH
Onboarding a new client with heavy video output	Existing process breaks under volume
Losing a revision to a missed email attachment	Frustration peak — "there has to be a better way"
Scaling from 2 videos/month to 10+	Manual review process hits breaking point
Switching from Frame.io due to cost	Looking for a lighter, cheaper alternative

Hiring remote editors/freelancers	Need async review tools

PHASE 1 (CONTINUED)

Competitive Landscape & Positioning

Competitive Map

COMPETITOR	PRICE	THEIR STRENGTH	PINPOINT'S ADVANTAGE
Frame.io	$15-25/user/mo	Industry standard, Adobe integration	PinPoint lives in Slack — zero onboarding. Frame.io is overkill for feedback-only teams
Vimeo Review	$7-20/user/mo	Video hosting + review	No video re-upload needed. Works with Slack files + YouTube/Loom/Vimeo links
Wipster	$20+/user/mo	Approval workflows	10x simpler. No setup. Share in Slack → review in 10 seconds
Loom	Free-$15/user/mo	Easy recording + reactions	Loom creates videos, not reviews. No frame-accurate annotations
Google Drive	Free	Zero cost	No video timeline, no annotations, no resolution tracking

PinPoint is the only video review tool that lives entirely inside Slack.

3 Defensible Differentiators

⚡ Zero-Friction Access

Click a button in Slack. No login. No onboarding. No account creation.

🔄 Two-Way Slack Sync

Comments in the web player appear in Slack threads. Resolution syncs via ✅ reactions.

🎨 Visual Annotations

Draw directly on video frames — circles, arrows, rectangles, freehand — with screenshot capture.

Messaging Pillars

PILLAR	CORE MESSAGE	PROOF POINT
Speed	"Review videos in seconds, not days"	One-click from Slack → web player. No uploads, no logins
Precision	"Pinpoint exactly what needs to change"	Timestamped comments + visual annotations on the actual frame
Simplicity	"No new tool to learn. It's just Slack."	Zero onboarding. Works with files already shared

Objection Handling

OBJECTION	RESPONSE
"We already use Frame.io"	PinPoint isn't replacing your DAM — it's a fast feedback layer where your team already talks (Slack). Use Frame.io for delivery, PinPoint for the back-and-forth.

"Can clients review without Slack?"	Yes — the review link works in any browser. No Slack account needed.
"Is it secure?"	Links are cryptographically signed and expire after 7 days. Videos are never stored on our servers.
"We don't upload videos to Slack"	PinPoint also works with YouTube, Vimeo, and Loom links shared in channels.
